

## Engineering Teaching Fellow

The University of Georgia has available a post-doctoral teaching fellowship for recent recipients of the Ph.D. in engineering. Fellows are selected based on the quality of their doctoral preparation and their potential to become excellent teachers. Fellows participate in a comprehensive program of instructional development intended to enhance their teaching skills and overall potential as faculty members. This program is coordinated by the Institute of Higher Education at The University of Georgia.

The Fellow's primary responsibilities will be in teaching undergraduate engineering classes. Approximately 30% of the successful candidate's appointment will be devoted to scholarship and professional development. All candidates with a doctoral degree in engineering will be considered, however, the most pressing current need is for a Fellow with background in structural engineering and mechanical engineering. The successful candidate must demonstrate ability and interest in teaching courses such as structures, environmental design of confined spaces, management of structural environments, machine design and hydraulics. A background related to biological systems is preferred but not required. Initial appointment is for 12 months and is renewable for up to two additional years. Please see the web site listed below for additional information. The position is available August 15, 2004 and applications received by July 1, 2004 are assured of consideration.

Applicants must submit a letter of application, resume, transcripts, and names of four professional references to:

Dr. E. Dale Threadgill, Director  
Faculty of Engineering  
Driftmier Engineering Center  
University of Georgia  
Athens, GA 30602-4435  
(706) 542-8855  
(706) 542-8806 (fax)
